

## Drug & Alcohol Walk-In Assessments

Our convenient drug and alcohol walk-in assessments enable individuals to receive a level of care assessment without an appointment on Monday - Thursday from 8:00 AM - 2:00 PM at our Assessment and Intake Office in Suite 619. Assessments are available by appointment on Friday.

## Adult Partial Program

This program consists of weekly individual sessions in addition to a group component that takes place five times per week for four hours. The average length of stay at this level varies by individual client need depending on treatment progress including attendance, participation, and ongoing medication management as needed during their participation in the program.

## Intensive Outpatient Program (IOP)

Our IOP offers 3 tracks that follow our evidence-based Matrix Model of group structures and topics. Though length of stay varies based on clinical progress, clients typically attend 3 groups per week, each 3 hours in length and up to 2 individual sessions per month for up to 8 weeks.

## General Outpatient Program (GOP)

Our GOP offers 2 tracks that includes one 3 hour group per week and two 1 hour individual sessions per month for up to 8 weeks as determined by clinical progress.

## Outpatient Mental Health Counseling

We offer client centered individual and family counseling with treatment frequency determined by clinical need. This service is available for clients ages 12 and up. Clients have access to a psychiatrist and ongoing medication management as needed throughout participation in the program. Clients must attend 2 sessions prior to each psychiatric appointment.

## Adolescent General Outpatient Program

Our Adolescent GOP consists of bi-weekly individual sessions in addition to a weekly group once per week for 3 hours. Average length of stay at this level is 8 weeks, depending on treatment progress including attendance, participation, and maintained sobriety.

## Adolescent Intensive Outpatient Program (IOP)

Our adolescent IOP consists of bi-weekly to monthly individual sessions in addition to a group component that takes place twice per week for 3 hours. The average length of stay at this level is eight weeks depending on the client's treatment progress, including attendance, participation, and maintained sobriety. Group is scheduled in the afternoon/evening to meet the needs of the adolescent population.

## Medication Assisted Treatment (MAT)

Individuals enrolled in our drug and alcohol treatment programs can receive Medication Assisted Treatment with Vivitrol®, Suboxone®, or Sublocade® in conjunction with their treatment services in one convenient location. These services are appropriate for people who are addicted to alcohol, heroin, or other opiates. Individuals enrolled in this service also attend a MAT Maintenance group once per month.

## Certified Recovery Specialist (CRS)

A CRS collaborates with an individual in early recovery to help remove barriers that often result in relapse. A CRS will fill many roles including recovery coach, resource broker, confidant, advocate, and role model. CRS services help individuals develop a sense of independence while achieving recovery.

## Addiction Awareness Program (AAP)

The AAP program is for those who meet criteria for Early Intervention Services. This program provides basic education on addiction including the disease concept, cycles of addiction, physical effects of the substance and relapse prevention. The AAP program consists of four consecutive group sessions that takes place weekly for two-hours in addition to two individual sessions. Early Intervention services are self-pay only.
