

Drug & Alcohol Walk-In Assessments

Our convenient drug and alcohol walk-in assessments enable individuals to receive a level of care assessment without an appointment on Monday from 8:00 AM - 4:00 PM, Tuesday - Thursday from 8:00 AM - 2:00 PM and Friday from 8:00 AM - 12:00 PM at our Assessment and Intake Office in Suite 602.

Adult Partial Program

This program consists of weekly individual sessions in addition to a group component that takes place five times per week for five hours. The average length of stay at this level varies by individual client need depending on treatment progress including attendance, participation, and ongoing medication management as needed during their participation in the program.

Intensive Outpatient Program (IOP)

Our IOP offers 3 tracks that follow our evidence-based Matrix Model of group structures and topics. Though length of stay varies based on clinical progress, clients typically attend 3 groups per week, each 3 hours in length and up to 2 individual sessions as needed or as determined by clinical necessity.

General Outpatient Program (GOP)

Our GOP offers 2 tracks that includes one 3 hour group per week and two 1 hour individual sessions as determined by clinical necessity.

Outpatient Mental Health Counseling

We offer client centered individual and family counseling with treatment frequency determined by clinical need. This service is available for clients ages 12 and up. Clients have access to a psychiatrist and ongoing medication management as needed throughout participation in the program. Clients must attend 2 sessions prior to each psychiatric appointment.

Adolescent General Outpatient Program

Our Adolescent GOP consists of bi-weekly individual sessions. Average length of stay at this level is 8 weeks, depending on treatment progress including attendance, participation, and maintained sobriety.

Medication Assisted Treatment (MAT)

Individuals enrolled in our drug and alcohol treatment programs can receive Medication Assisted Treatment with Vivitrol®, Suboxone®, or Sublocade® in conjunction with their treatment services in one convenient location. These services are appropriate for people who are addicted to alcohol, heroin, or other opiates. Individuals enrolled in this service also attend a MAT Maintenance group once per month.

Certified Recovery Specialist (CRS)

A CRS collaborates with an individual in early recovery to help remove barriers that often result in relapse. A CRS will fill many roles including recovery coach, resource broker, confidant, advocate, and role model. CRS services help individuals develop a sense of independence while achieving recovery.
