- » Individual counseling
- » Group counseling
- » Family counseling
- » Center of Excellence (COE) services
- » Relapse prevention
- » Enhanced outpatient groups
- » Clinical evaluations

### Medication Assisted Treatment (MAT) Outcomes

MAT is a proven, effective option for many individuals recovering from opiate addiction. It offers individuals a reprieve from the physical symptoms of addiction and an opportunity to focus on the enhanced outpatient groups and ongoing counseling crucial to recovery.

Clients meet with a nurse and/or physician to take a prescribed dose of methadone and a counselor to address their individualized addiction, recovery, and medical challenges and goals.

Referrals to an intensive outpatient program and self-help groups inclusive of Narcotics Anonymous and/or Alcoholics Anonymous are provided for clients who need additional recovery support.
